one-touch

Versatility on demand.

The one-touch is a mobile, multi-functional training table that accommodates specific needs in a diversified range of training and learning scenarios within corporate and institutional environments.

The one-touch table is ideal for dynamic environments requiring frequent and easy reconfiguration and storage. Tables can be gathered together using the quick linking mechanism to create a variety of applications.

Touch and Go.

Table set-up is easy. Worksurfaces tilt and lock into an upright position with a simple touch of a button.

Save Space.

Tables can be conveniently stored when not in use by nesting them together, saving valuable real estate.

Electrical Harness.

Promotes distribution of power filtered easily through each connected table.

Accessory Tray.

Convenient and practical. Neatly stores books, laptops and other essentials.

Linking Mechanism.

Connect tables together as required to promote sequential power distribution and prevent disconnection.

Metal Embossed Modesty Panel.

A visual privacy option that promotes the overall aesthetic of the table, while discreetly concealing, routing and storing wires and cables.

Data/Power Grommet.

Provides proprietary power and data above the worksurface when required for individual or linked tables.

Wire Management Trough.

The optional wire management trough accommodates lay-in wires and cables for data & power distribution in individual or linked tables.

Lecture Hall.

Continuing education collaboratively.

Tables can quickly disconnect and reconnect to create groups for hands-on exercises.

Breakout Room.

Come Together. Collectively.

Tables can gather together for an impromptu brainstorming session or teaming exercise.

Training Room.

Congregate. Cultivate. Educate.

Tables can be quickly aligned in rows and linked to create a classroom or training room setting.

Boardroom.

Meeting now in session.

The One-Touch Table provides a streamlined design suited for formal or informal meetings.
